From the desk of Dick Rochrohr, Director of the Idaho Rally Group:

Next up in the 2011 CRS Rally calendar is the Idaho Rally scheduled to take place in Boise County, Idaho on June 18th and 19th. The rally will be held on Saturday and Sunday with optional Recce Friday. In addition to being a CRS points event, Idaho is the first event in the west for the United States Rally Championship (USRC).

Saturday will be a coefficient 3 event with approximately 67 stage miles and 80 transit miles. Sunday will be a coefficient 2 event with approximately 44 stage miles and 65 transit miles. The Idaho Rally is unique in that it welcomes all sorts of vehicles; ATV, UTV, and Motorcycles will be allowed to trailer the 25 miles from the host hotel in Boise to the stages each day. The organizers have set up a very compact rally with service in the town of Placerville both days. The stages will be run no more than twice each direction and will be on county maintained roads with a decomposed granite service with only light gravel. The roads should be smooth with good traction, speed averages historically are between 40-54 mph for the cars. Dick Rochrohr, the Director of the Idaho Rally Groups states, "We are trying hard to put on an affordable Rally laid out how we would like a rally to be laid out. The club has members with over 40 years of racing and promoting experience. We hope you come and enjoy the rally."

The 2011 Idaho Rally is promoted by the Idaho Rally Group and sanctioned by NASA Rallysport. The rally will be awarding CRS, PNWR, and out of region Rally America (RA) points and will accept both NASA and RA completion licenses.

Don't miss out on what guarantees to be another historical Idaho Rally!
